Professional Summary

Senior Software Engineer with **5+ years** of experience building and shipping production systems, including a **live public-sector information management platform** and a multi-module enterprise ERP as **founding engineer**. Specializes in **Node.js**, **Express.js**, and **Next.js**, with deep experience in RESTful APIs, WebSockets, **payment gateway integration**, and database optimization across **PostgreSQL** and **MongoDB.** Combines end-to-end technical delivery with direct client-facing work, spanning requirements gathering, technical proposals, and training and consulting for enterprise clients.

Skills

- **Backend:** Node.js, Express.js, Next.js, RESTful APIs, WebSockets, JWT.
- **Frontend:** React.js, Next.js, Tailwind CSS, Vue.js, Vite, Material-UI, Shadcn/UI.
- **Databases:** PostgreSQL, MongoDB, Supabase, MySQL.
- **DevOps & Infrastructure:** Docker, Nginx (Reverse Proxy & Load Balancing), Linux, CI/CD, Git/GitHub.
- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL.
- **Practices:** Agile, OOP, database optimization, unit & integration testing, technical documentation.
- **Business:** Requirements gathering, technical proposals & bids, client training, consulting.

Professional Experience

Founding Engineer 01/2026 - Present
Agentic Curve (US-based startup) - Full-time - Remote

- **Founding engineer** and stakeholder in a **multi-module enterprise ERP** platform built with **Next.js**, **Supabase**, and **PostgreSQL**, covering CRM, international trade management, fleet management, inventory, accounting/finance, HRM, and document signing.
- Owned the **CRM, Inventory Management, and International Trade Management** modules end-to-end, from data modeling and API design through frontend delivery.
- Contributed to the **Fleet Management module** in collaboration with a partner engineering team.
- Designed cross-module data flows and shared API structures to keep modules interoperable within a single platform.

Consultant & Trainer (Freelance) 06/2026 - Present
VuleroTech - Addis Ababa, Ethiopia - Part-time - Onsite

- Deliver **CRM consulting** and **hands-on training** to enterprise clients including **Akoya Properties** and **Ermias Advertising**, advising on configuration, adoption, and workflow design.

Software Engineer & Account Executive 11/2023 - 07/2026
Baro Technologies - Burien, WA, USA (Remote) & Addis Ababa, Ethiopia (Onsite) - Full-time - Hybrid

- Developed and deployed the **Integrated Information Management and Communication System (IIMCS),** a live member management platform delivered for a regional public-sector organization in South West Ethiopia.

- Designed and deployed a full-stack **SaaS platform** (Next.js, TypeScript, Tailwind CSS) serving **300+ DAUs**, with integrated subscription payment processing, on a containerized multi-server infrastructure using **Docker** and **Nginx**.
- Led a **team of 4 developers** on select projects in an Agile environment, running daily stand-ups and peer reviews to maintain code quality and delivery timelines.
- Authored 10+ technical bid documents and project proposals with an **85% win rate**, translating client requirements into scoped technical solutions.
- Served as **primary technical contact** for prospective and active clients, handling requirements gathering, solution scoping, and stakeholder communication through to contract award.

Programming Lecturer 10/2022 - 06/2024

Ethio Robo-Robotics - Addis Ababa, Ethiopia - Part-time - Onsite

- Delivered courses in C++, C#, Java, Python, and Web Development to over 30 students.
- Judged the **VEX African Robotics Championship** in 2023 and 2024.

Project Lead | Senior Backend Developer 02/2021 - 06/2023

Ahaz Software and Web Technology Solutions - Addis Ababa, Ethiopia - Full-time - Remote

- Joined as **Junior Software Engineer**; promoted to **Software Engineer** within a year, then to **Senior Backend Developer & Project Lead** after co-leading a 3-person development team.
- Developed MERN-stack web applications including an **HR and attendance management platform**, using **WebSockets** for real-time attendance tracking and live data feeds.
- Built and maintained **RESTful APIs** with **Express.js,** implementing **JWT authentication** and **role-based access control (RBAC)** for secure session management.
- Optimized complex **PostgreSQL** queries by adding indexes on high-traffic lookups and restructuring the data model, significantly reducing p95 API latency.
- Built a Python/Qt5 desktop app integrating **third-party biometric scanning hardware** to automate the full attendance-to-payroll workflow, eliminating manual timesheet entry.
- Introduced unit testing and code review practices, and mentored interns and junior developers.

Education & Certifications

- Bachelor of Science in Computer Science, 2022
  HiLCoE School of Computer Science and Technology - Addis Ababa, Ethiopia
- Certificate of Recognition**, IIMCS digital platform** delivery (May 2026)
- Scientific Computing with Python, freeCodeCamp
- AI Career Essentials (AiCE), ALX
