Professional Summary

Software Engineer with 4+ years of experience designing, developing, and deploying secure, scalable applications. Proficient in **Node.js**, **Express.js**, and **Python**, with expertise in **RESTful APIs**, **WebSockets**, high-availability infrastructure, and **database optimization (MongoDB and PostgreSQL)**. Proven track record in end-to-end project delivery, from architecture to deployment, including implementing **JWT authentication**, **payment gateways** (handling webhooks and recurring billing) and DevOps automation. Skilled at working in remote Agile environments, with a strong focus on performance optimization and writing maintainable code.

Skills

- **Backend:** Node.js, Express.js, Next.js, RESTful APIs, WebSockets, JWT, MERN Stack.
- **Frontend:** React.js, Next.js, Tailwind CSS, Vue.js, Vite.
- **Databases:** PostgreSQL, MongoDB, MySQL, NoSQL.
- **DevOps & Infrastructure:** Docker, Nginx (Reverse Proxy & Load Balancing), Linux, CI/CD, Git/GitHub.
- **Languages:** JavaScript (ES6+), TypeScript, Python.
- **Tools:** Git/GitHub, Unit & Integration testing, Postman, AI Coding Tools.

Professional Experience

Software Engineer 05/2024 - Present

Baro Technologies - Addis Ababa, Ethiopia - Full time - Onsite

- Designed and deployed a full-stack SaaS platform from concept to deployment, taking full ownership of the full system using **Next.js**, **TypeScript**, and **Tailwind CSS**.
- Designed and implemented a high-availability, multi-server infrastructure from scratch, utilizing **Docker** for **containerization**, and **Nginx** for reverse proxy and load balancing to ensure system resilience.
- Led a team of 5+ developers in an agile environment, facilitating daily stand-ups, conducting peer reviews, and providing actionable feedback to ensure code quality and on-time delivery.
- **Develop, deploy and maintain** 3+ software solutions, adhering to project requirements and deadlines.

Programming Lecturer 10/2022 - 06/2024

Ethio Robo-Robotics - Addis Ababa, Ethiopia - Part-time - Onsite

- Delivered courses in **C++**, **C#**, **Java**, **Python**, and **Web Development** to over 30 students, demonstrating strong **English communication skills** and the ability to explain complex technical concepts clearly.
- Judged the **VEX African Robotics Championship** in 2023 and 2024.

Software Engineer & Technical Officer 03/2023 - 05/2023

Ahaz Software and Web Technology Solutions - Addis Ababa, Ethiopia - Full time - Remote

- **Developed** MERN-stack web applications for an HR management platform, implementing **WebSockets** to handle real-time attendance tracking and live data feeds.
- Optimized complex database queries in **PostgreSQL**, reducing API response times through efficient indexing and data modeling.

Nathnael Tesfaye Woldekidan – | Backend Engineer • NodeJS • ExpressJS • System Architecture |

- Implemented robust authentication systems using **JWT**, ensuring secure session management and role-based access control (**RBAC**).
- Built and maintained robust **RESTful APIs**, ensuring seamless integration with third-party biometric hardware.

Junior Software Engineer

10/2021 - 10/2022

Ahaz Software and Web Technology Solutions - Addis Ababa, Ethiopia - Full time - Remote

- Developed **over 5 web and desktop applications**, designing and building the **backend** functionality and databases (**PostgreSQL, MongoDB**) for multiple platforms.
- Integrated **biometric scanning devices** into **desktop applications** for enhanced security, demonstrating experience with third-party system integration.

Education | Certifications | Licenses

- Bachelor of Science in Computer Science
HiLCoE School of Computer Science and Technology - Addis Ababa, Ethiopia
- Scientific Computing with Python – freeCodeCamp
- Git & GitHub Projects: Project-Based Learning (8 Projects) – Udemy
- ALX AiCE – AI Career Essentials – ALX
- Business Fundamentals: Effective Communication – FutureLearn

Key Projects

- **High-Availability E-commerce (YeneCart):**
 - Architected and built the complete multi-tenant platform using **Next.js**, designing a scalable MongoDB schema to handle isolated tenant data.
 - **Integrated payment gateway** (ArifPay) to build and manage the platform's subscription model, handling secure transactions, recurring billing, and service webhooks.
 - Deployed the application using **Docker containers** and **Nginx**, optimizing the server for 99.9% uptime.
- **Integrated Project Management System:**
 - Developed a collaborative platform supporting **WebSockets** for instant task updates and team notifications.
 - Built a modular API structure to handle complex Kanban board logic and task state management.
- **Pharmacy Inventory & Employee Management System:**
 - Designed a relational database schema for pharmacy stock management, ensuring data integrity for thousands of inventory items.
 - Implemented **Role-Based Access Control (RBAC)** on the frontend to dynamically hide/show UI elements based on user permissions.
- **Biometric HR Management Platform:** Developed a standalone desktop application using **Python** and **Qt5** that **automated** critical workflows, from real-time attendance tracking to final payroll processing by **integrating biometric scanning devices**, and utilizing a lightweight **SQLite database** for local data management to reduce manual data entry and errors.
- **Company & Client Websites:** Delivered 4+ professional websites for clients across industries (law, coffee, technology, e-commerce), converting high-fidelity **Figma mockups** into responsive, production-ready front-ends. Shipped fully deployed, live websites with modern UI/UX, optimized performance, and cross-device compatibility.
